## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim1 is rejected under 35 U.S.C. 102(e) as being anticipated by Alby (USPN 6,241,730 B1, cited by applicant in IDS). Referring to claim 1, Alby discloses an assembly comprising a prosthesis (implant, col.2, lines 66-67), a support (4Ba), a mount (8A) carried by the support, the mount having a mounting surface (outside surface of 7 and 4A, see figure 1), and a locking mechanism coupled to the mount comprising a series of stacked washers (12), capable of allowing and restraining movement.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Hwang (USPN 5,725,597, cited by applicant in IDS). See figures 3, 5, and respective portions of the specification. Referring to claim 1, Hwang discloses an assembly comprising a prosthesis (11, 14, 30), a support (19), a mount (18) carried by the support, the mount having a mounting surface (22), and a locking mechanism coupled to the mount comprising a series of stacked washers (26, 20, 21, 24), capable of allowing and restraining movement.
